

T3100

DELIVERY SYSTEM WITH SCALER WITH FIBER OPTICS

The ProComp tabletop unit is a complete dental system incorporating its own air compressor, water, and dental handpiece selection system.

Designed to be easily moved and used on a tabletop or cabinet, all dental tools and controls are within easy reach for efficient operation.

FEATURES

- Oil-free compressor provides clean air to the dental tools and is maintenance free.
- The unit's compact size makes it easy to store when not in use and easy to move when needed for procedures.
- Cutting, grinding, polishing, and scaling of small animal dental surfaces can all be accomplished with maximum speed and quality outcomes.
- Quieter than the competition at only 55dB allows for normal conversation in the operating environment.
- Comes with three-way air water syringe.
